Introduction/Aims and Objective

Review carefully current state of the study research field citing key publications. Finally, briefly mention the main aim of the work and highlight the main conclusions.

Materials and Methods

Describe precisely your selection of the observational or experimental subjects (patients, including controls). Identify the methods, apparatus (including manufacturer's name and address in parenthesis), and procedures in sufficient detail to allow others to reproduce the method. New methods and protocols should be described in detail while well-established methods can be briefly described and appropriately cited. Identify precisely all drugs and chemicals used, including their generic names, their manufacturer's name, city and country in parenthesis, doses, and routes of administration.

Results

Provide a concise and precise description of

the only important observations of experimental results, their interpretation as well as the conclusions that can be drawn. Do not repeat in the text all the data in the Tables, and Figures. Restrict Tables and Figures to those needed to explain the argument of the paper and to assess its support. Avoid duplication and repetition of data in Figures and Tables. Specify the statistical methods used to analyze the data.

Discussion

Authors should discuss the results and how they can be interpreted in perspective of previous studies and of the working hypotheses. The findings and their implications should be discussed in the broadest context possible and limitations of the work highlighted. Future research directions may also be mentioned. This section may be combined with Results.

Conclusions

This section is not mandatory, but can be added to the discussion.

Figures and Legends

All Figures must be submitted on separate sheet, in JPEG finished format that is ready for reproduction. Figures should be numbered consecutively in Arabic numerals (e.g. Figure 1, 2, 3) according to the order in which they have been first cited in the text. If photographs of persons are used, the subjects or patients must not be identifiable.

Legends

Present the legends for Figures on separate sheet (Font size: 12) using double-spacing with Arabic numerals corresponding to the Figures.
